

What pretty teeth— yet she has "Acid-Mouth"

Until she made a simple test, she thought that all was well with her pretty white teeth.

Tooth decay starts unfelt and unseen. Teeth that seem sound and look white and pretty as you glance in the mirror may be in the early stages of decay, victims of that tireless enemy of healthy teeth—"Acid-Mouth."

Dental scientists tell us that "Acid-Mouth" is a cause of rapid tooth decay. Nineteen out of twenty persons are said to have "Acid-Mouth."

Are you one of the nineteen, or the one in twenty that is free from "Acid-Mouth"? A simple test in your own home will tell you at once. We will send you the materials to make the test.

If you find you have "Acid-Mouth," start using Pebeco Tooth Paste at once. Pebeco is the scientific dentifrice that counteracts "Acid-Mouth," keeps the teeth white and sound, the gums strong, and the mouth cool, sweet and refreshed.

How to tell if you have "Acid-Mouth"

*First send for Litmus Test Papers
and big trial tube of Pebeco*

Then moisten a blue Litmus Test Paper on your tongue. If it turns pink, that indicates an acid condition of the mouth. Brush your teeth with Pebeco and make another test. The paper will not change color, thus demonstrating how Pebeco helps to counteract "Acid-Mouth."

LEHN & FINK, Inc.,

635 Greenwich Street, New York

Ask your Druggist for the Pebeco Tooth Brush—It cleans every part of every tooth.

Canadian Agents: Harold F. Ritchie & Co., Limited, 10 McCaul Street, Toronto.
